

My Products

Your products page

The Products page is an opportunity to broadcast your incredible products to the whole of the pharma community. Adding unique descriptions and images will ensure your product reaches your target audience.

Advertise your products with:

- A unique name
- Several product categories
- An enticing description
- Multiple images and one product video
- Associated documents so your customers can access all the information they need

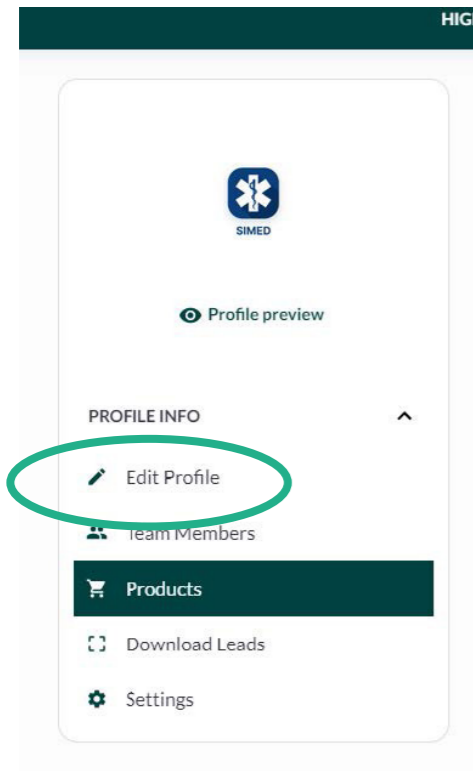

You can also attach a team member to each product. This allows your potential clients to contact the product specialist directly.

Products can be toggled to active status (visible to others) or inactive (visible only to you). This can be changed at any time.

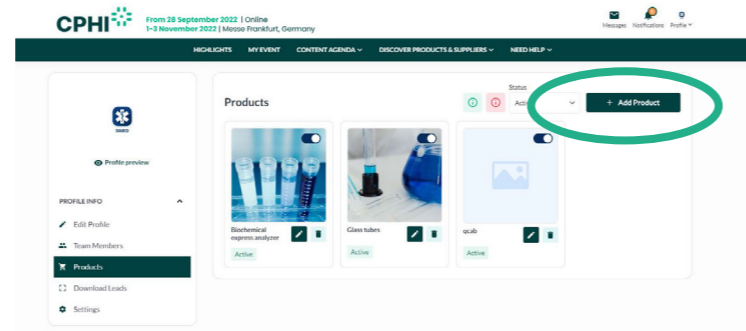

Edit your products

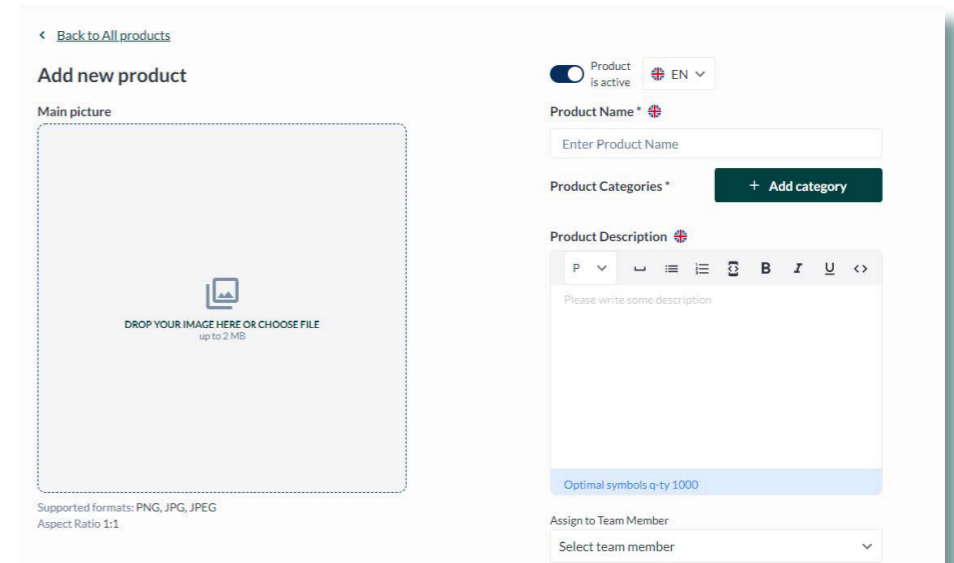

Step 1: Click on “Products” from your Company Profile view

Step 2: Click on “Add Product” or to edit your product 

Step 3: Start editing your production information
