

Digital BPM for faster network infrastructure deployment

C20.0.56

Catalyst - Digital Transformation World 2020

Scope

This Catalyst uses **BPMS**, **AI** and **Open APIs** for digitalization deployment management of network infrastructure. Full digitalization management between STC and partners in deployments which meets business and customer expectations of service. STC Digitalization dares to deliver excellence.

stc

Outcome

We created a solution which has been approved and being piloted in STC using a combination of **AI**, **BPMS** and **Open APIs** which fundamentally reduces lead time for deployment of new or upgraded 2G,3G,4G,5G radio networks.

Benefits

- Increase time to market
- Meet financial targets
- Fulfil sales and marketing demands
- Opportunities to reduce OPEX headcount

TM forum Assets

- ETOM
- TAM
- Open APIs
