GDi Ensemble W⁴

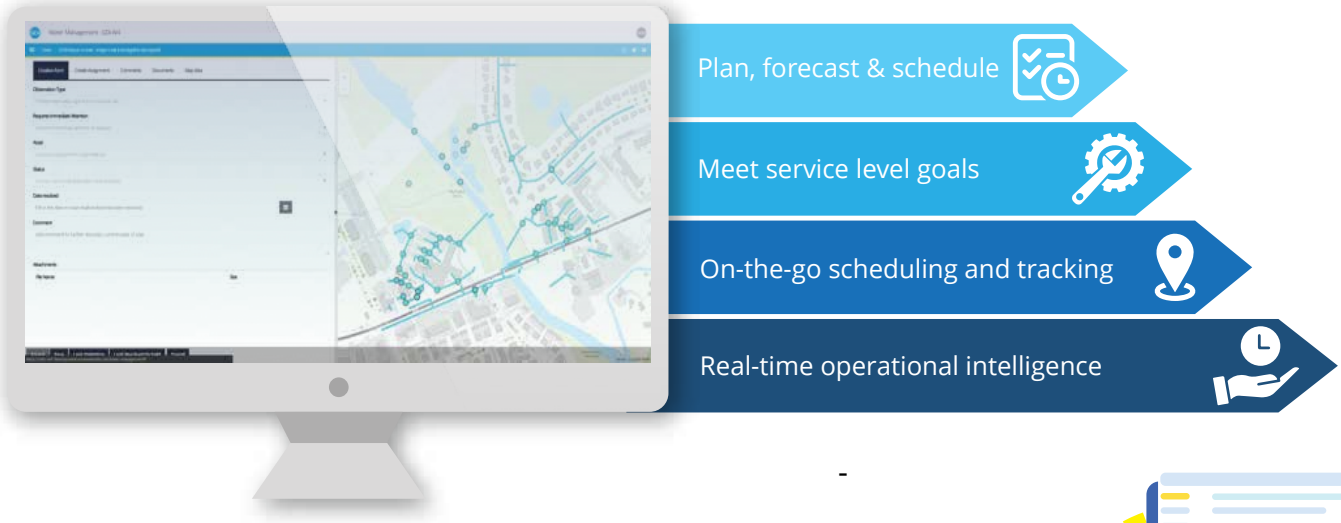
GDi Ensemble W⁴ is the most extensive cloud-based workforce management software consisting of web and mobile applications that enable organizations from different industries to efficiently plan, forecast, and schedule work and related resources to meet service level goals. It provides for the complete management of work orders, people, and processes at all stages of any task, across all departments, at any location, and under various working conditions. Our solution provides complete real-time operational intelligence, enabling evaluation of how and when work is being done, and determination of progress status for all work items.



Why GDi?

- Multi-disciplinary international team of experts experienced in delivering customer orientated solutions resulting in simple end-user adoption of application
- Leader of producing digital twins for multi-industry projects
- Owner of 100% of IPR for propriety solutions
- Experienced Data Production and GIS regional competence center for 30 years
- Successfully digitized the most complex processes in the telecom sector and central government
- Best practice sharing and localization in 12+ markets
